A) Image Area (4" x 7.25")

5x8
Outside Front

How To Use This Template:
Place the components of your custom cover design according to the guidelines below:

A) Image Area: The important components of your cover design should fit within the white Image Area rectangle. This includes the main parts of your design, and any text or logos.
B) Background Area: Background colors and/or photos can extend out and fill in the Background Area. All elements in the Background Area must extend fully past the Trim to the specifications shown. Parts of the Background Area will be trimmed and interrupted by the coil. (The part of the Background Area that goes past the trim is known as the bleed. Although this part of the cover will be cut off, it ensures that no unwanted slivers of white paper show through around the edges of your cover art.)
